

Thank You!

November 22, 2017

Dear Senator Schumer:

With the Trump Administration and their allies in Congress working to gut the U.S. Environmental Protection Agency and roll back key environmental protections and safeguards that prevent people from getting sick and dying, it is gratifying to know that there are leaders in Washington standing up to prevent such recklessness.

On October 12th in Lower Manhattan you joined with the citizens, community leaders, and environmental leaders to firmly declare that you and your colleagues would fight to prevent any cuts to EPA's budget. In doing so, you sided with people over the polluters assaulting the EPA. You stood up for the health of our nation—especially the young, the old, those with diseases worsened by pollution, and those in low-income communities already disproportionately impacted.

Thank you for standing up. Thank you for committing once again to beat back the damaging proposals put forward by President Trump and the House leadership.

We stand ready to assist you and your colleagues in the Senate on the budget fight that is to come. To realize the brighter, healthier future that all deserve, we will have to engage and mobilize people to act like never before.

Know that we are with you and ready to prevail.

With deep gratitude,
