

EANY SUPPORTS Electric Landscaping Equipment Rebate

[S5853 \(Krueger\)](#)

[A5681 \(Otis\)](#)

Explanation:

This bill creates a rebate program to incentivize commercial landscapers and individuals to transition to electric lawncare equipment.

Gas-powered landscaping equipment, such as lawn mowers and leaf blowers have a large carbon footprint, impact air quality, and pose harm to individuals operating the equipment. Landscaping equipment emit greenhouse gas emissions and harmful co-pollutants including hydrocarbons, nitrogen oxides (NO_x), carbon monoxide (CO), and fine particulate matter (PM). The noise intensity from this equipment is significant as well, [which has been documented to contribute to hearing loss in workers.](#)

The solution to the high-emitting, extremely loud landscaping equipment is their battery-powered, zero emissions, quieter counterparts. Electric landscaping equipment is now a viable option for landscaping company fleets and households; however, gas powered equipment's competitive edge lies in the cheaper upfront cost.

This bill incentivizes the transition from gas powered to electric powered landscaping equipment through the creation of a rebate program at the point of sale for electric landscaping equipment. Institutions or businesses are eligible for annual rebates up to \$15,000, while individuals are eligible for annual rebates up to \$300. Purchasers may also receive additional batteries and chargers for certain eligible lawn care devices, an 100% rebate of the purchase price for up to two batteries and one charger per eligible lawn care device purchased.

Summary:

This bill amends the Public Authorities law by establishing an electric landscaping equipment rebate program, which establishes rebate caps for commercial and individual purchasers of eligible equipment; authorizing NYSERDA to develop rules and regulations to determine rebate eligibility and an education and outreach program; and requiring NYSERDA to publish rebate funding balances on its website and to submit annual reports on the status of the program. The bill takes effect immediately and expires on January 1, 2030. The rebate program is not to be funded through taxes, fees, or surcharges.
